Credit Type of assessment	15 ECTS Oral examination, 2	30 minutes	reportion the -
Exam registration req	irements Approved presenta	tion of project report	during the course.
Aid Marking scale	All aids allowed 7-point grading sca	le	
Censorship form Criteria for exam asse	External censorship	)	
To achieve the maxim	m grade of 12, the student	shall be able to:	undomentals to still
<ul> <li>Describe how to el the needs screenir</li> <li>Describe and differentiation</li> </ul>	servery search for and summ process. antiate between observations	build be usease state f	unuamentais to aid
Describe and differ     Describe how to tr     appropriate in cost		al need statement th	at is accurate,

- appropriate in scope and solution independent.
  Describe how the identified needs correlate to existing treatment options.
  Explain how to perform a gap analysis that can lead to identification of opportunities within the treatment landscape.
  Discuss the clinical setting and the identified needs and how the aim of the prototype is identified.
  Discuss the stake holder/market analysis in connection with the innovation.

- Explain how to develop a needs ranking system.
  Explain how to cluster and organize the output of an ideation session so it can be presented and analyzed in a meaningful way (concept mapping).
  Discuss the prototyping process for the innovation.
  Explain how to search for existing patents, freedom to operate and prior art.
  Discus the how to choose the appropriate business model based on the unique characteristics of the innovation and its customers.
